Nottinghamshire Stoma Ancillary Items Formulary

Our overall aim in prescribing stoma appliances is to provide the best products for each individual patient to avoid sore skin and prevent other problems developing with a stoma. Stoma patients will be supplied with products that are necessary and appropriate. Some products, including skin washes, bag covers, and underwear, will not be supplied unless agreed as being clinically essential by a stoma nurse.

Non-formulary products should not be routinely prescribed except on the specific recommendation of the stoma nurse	
⚠ **This table outlines the normal maximum usage. Requests for higher quantities should always be queried with a stoma nurse.**	
Adhesive removers, sprays, and wipes **Use each time the stoma bag is changed. Wipes are to be initiated by a specialist nurse as they perform various functions for patients. May be more useful for patients with reduced dexterity.** **Don't prescribe both (it's one or the other).**	
Adhesive Removers, Sprays and Liquids (50mls)	Reasonable usage: 1-2 packs per month (ileostomy/colostomy); no more than 3 per month (colostomy). A larger pack size may be more cost-effective if available. Not required by all patients
Adhesive Remover Wipes (30)	Reasonable usage: 1 box (30) per month (2 boxes if colostomy)
Skin Fillers and Protectives **(Barrier Creams, Pastes, Aerosol, Lotions, Powders, Gels and Wipes)**	**Sprays (50mls)** - reasonable usage: 1-2 per month per 30 colostomy/60 ileostomy bags. Only by recommendation from stoma nurse. Sprays on more cost-effective and first-line choice **Wipes (30)** - reasonable usage: 30 per month (if skin is red). Only by recommendation from the stoma nurse (reserve for patients that lack manual strength or dexterity) **Applicators** - reasonable usage: Not for repeat prescribing, least cost-effective, rationale for prescribing to be added to the patient's medical record by a Stoma nurse **Powders** – 1 bottle every 1-3 months **Pastes – 1-2 tubes per month**
Discharge Solidifying Agents	1 or 2 strips after emptying if high output.
Deodorants	The quantity of deodorants prescribed per month is to be rationalised to 1 bottle per month

Bag Pouches	
No preferred brand – these are patient-specific and should be decided by a stoma nurse	
TYPE	**NORMAL USAGE**
Colostomy (Non-drainable) bags	30-90 bags a month (1-3 bags per day)
Ileostomy (Drainable) bags	10-30 bags a month (1 bag every 1-3 days)
Urostomy (Drainable) bags	20-30 bags a month (1 every 1 to 3 days)
Night drainage bags	4 bags (1 box of 10 bags every 2-3 months) – Use a new bag every 7 days
Flange (for 2 piece system)	15 flanges – change every 2-3 days
Bag belts	3-6 per year – usage may vary

ADHESIVE REMOVERS (SPRAYS, LIQUIDS, WIPES)			
Adhesive Removers (Sprays and Liquids)			
Brand	**Code**	**Quantity**	**Unit cost *(May 25)***
