

**Wound Care Formulary for CityCare Version 12**

The Wound Care Formulary for CityCare will comprise of 3 lists:

**LIST ONE** – This list is for all your weekly dressing stock order.

**LIST TWO** – This list contains dressings which are on list one but are larger sizes that you will not require on a regular basis in order to obtain these please contact your manager for authorisation. It also contains specialist dressings that are not required on a regular basis, if these are needed then your manager can authorise two weeks of dressings, if they are needed for longer then please ring the Tissue Viability Team to discuss the rationale for use. There are also some dressings that can only be authorised by the Tissue Viability Team.

**LIST THREE** – This list contains products which need to be obtained by prescription.

Any products required which are not on list 1, 2 or 3 please ring Tissue Viability Team to discuss.

**LIST ONE – WEEKLY STOCK ORDER**

<b>STERILE DRESSING PACK – SOFTDRAPE</b>		<b>RICHARDSONS</b>

50g tube	£3.85
----------	-------

Larvae – please contact Tissue Viability Team for advice

<b>MEDI DERMA-S TOTAL BARRIER CREAM</b>			
28g	£2.98	PIP 388-3121	First line barrier treatment for skin at risk of moisture damage or skin that has mild moisture associated skin damage. Will not block absorption of continence pads.
90g	£5.95	PIP 341-3325	
<b>MEDI DERMA PRO CLEANSER AND OINTMENT</b>			
250 ml Foam and spray incontinence cleanser	£4.66	PIP 399-6923	For moderate to severe moisture associated skin damage, that is where contamination is a problem and the skin needs to be frequently cleansed but must not be a fungal problem. The cleanser removes bodily fluids and the ointment provides a protective barrier which is thicker than a barrier cream. Once the moisture damage is resolved MediDerm-S should be used as a barrier.
115g Skin protectant ointment	£7.85	PIP 399-6931	
<b>MEDI HONEY BARRIER</b>			
50g	£4.89	PIP 338-7644	For moderate to severe moisture associated skin damage can be where there is thought to be a bacterial or fungal problem. Once the moisture damage is resolved MediDerm-S should be used as a barrier.
